

Candidate-Pool Opportunity and Selection Stability under Finite Validation

A Task and Data Registration

9 endpoints · registered
curated · no overlap

B Candidate Pool Expansion

32 registered Morgan candidates
fixed order · no reordering
34 560 candidate fits

C Repeated Nested Scaffold Audit

10 seeds · 3 outer × 3 inner
selection inside · audit outside

D Utility-Pattern Diversity

raw · centred · fixed reference
rank · effective diversity

E Chance-Adjusted Ranking

CAHit@3 · MRR · NDCG
rank correlation

F Reference and Gap Decomposition

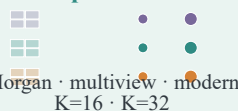

K-invariant full registry
K-dependent prefix
Same-fold opportunity
completion gap · selection gap

G Split-Regime Transfer

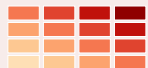

scaffold · similarity component
direction transfer

H Equal-Size Registry Composition

Morgan · multiview · modern
K=16 · K=32

I Finite-Audit Winner Optimism

K ↑ · n ↓ · known-truth simulation

J Support-Aware Reliability

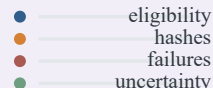

novel ↔ related
error · FN · disagreement

K Four-Model Error Audit

RF · GCN · CBT · MFM
overlap · disagreement

L Auditable Evidence Record

eligibility
hashes
failures
uncertainty

Candidate-pool expansion changes available opportunity and selection stability;
effects remain endpoint-, registry- and support-dependent.
